

# Sudoku

Créer un script qui affiche la solution du sudoku passé en premier argument.

Ex. d'appel du script :

```
$> ./sudoku s.txt
```

```
195|784|263
```

```
386|529|147
```

```
472|163|985
```

```
----+----+----
```

```
637|852|419
```

```
859|641|732
```

```
214|397|658
```

```
----+----+----
```

```
923|418|576
```

```
548|976|321
```

```
761|235|894
```

```
$> ./cat s.txt
```

```
195|784|2__
```

```
3_6|529|147
```

```
472|1_3|985
```

```
----+----+----
```

```
